

Kaavalry

Pick Your Protection. Deploy with Precision.

Who We Are

Kaavalry delivers world-class cybersecurity services to mission-driven organizations — from small and medium-sized businesses (SMBs) to nonprofits. Founded by a former CISO with decades of frontline experience in security, compliance, and risk management, Kaavalry operates as your virtual cybersecurity department, delivering results without internal complexity.

Value Proposition

Kaavalry’s cybersecurity projects are designed to meet you where you are — whether you're launching a compliance initiative, preparing for an audit, or responding to a breach. Each engagement is scoped for clarity, delivered with precision, and aligned to your strategic goals. No fluff. No lock-in. Just expert-led execution.

Facing These Challenges?

Strategy & Leadership

No internal CISO or strategic voice guiding security decisions

Risk & Compliance

Struggling to meet HIPAA, SOC 2, NIST, PCI, or other requirements; outdated/missing policies

Assessment & Testing

Unsure how exposed your systems really are

Tooling & Vendor Selection

Decision paralysis when comparing MDRs, SIEMs, endpoint tools, or compliance platforms

Awareness & Training

Employees fall for phishing attempts or lack basic cyber hygiene

Incident Preparedness

Insurance carriers require tabletop exercises or IR documentation

Cloud & Infrastructure

Cloud misconfigurations and identity drift

Documentation & Due Diligence

Security questionnaires delay deals or partnerships

Our Solutions

vCISO advisory, roadmap creation, maturity assessments, board reporting

Gap analysis, SOC 2/HIPAA/NIST/PCI DSS readiness, policy development, audit prep

Penetration testing (app/network), vulnerability scans, config reviews

Vendor risk evaluation, tool consolidation strategy, procurement and RFP assistance

Phishing simulations, LMS integration, custom training modules

IR playbooks, tabletop exercises, breach response planning

Cloud hardening, identity governance, asset inventory

Security questionnaires, M&A exposure assessments, compliance mapping, vendor risk assessments

Engagement Options

Flexible Options

Single Project

One-off initiative with defined scope and deliverables

Multi-Project Bundle

Combine 2–3 projects for strategic alignment

Retainer Add-On

Layer projects into existing Kaavalry services

Build your cybersecurity roadmap one project at a time.
