

Kaavalry

Strategic Cyber Leadership. Fractional Cost. Full Impact.

Who We Are

Kaavalry delivers world-class cybersecurity services to mission-driven organizations — from small and medium-sized businesses (SMBs) to nonprofits. Founded by a former CISO with decades of frontline experience in security, compliance, and risk management, Kaavalry operates as your virtual cybersecurity department, delivering results without internal complexity.

Value Proposition

Kaavalry’s virtual CISO (vCISO) Services deliver seasoned cybersecurity leadership tailored to your business goals — without the cost or delay of hiring a full-time CISO. Whether you're navigating compliance, scaling operations, or responding to emerging threats, our fractional CISO hours give you the clarity, confidence, and executive insight to lead securely.

Leadership Gaps We Fill

-  **No Strategic Security Voice at the Executive Table**
Security decisions are reactive, disconnected from business goals, and lack board-level advocacy.
-  **Fragmented Compliance Oversight Across Departments**
Regulatory mandates (HIPAA, SOC 2, NIST, etc.) are siloed, creating audit friction and reputational risk.
-  **Post-Acquisition Security Blind Spots**
Newly acquired entities lack baseline assessments, unified tooling, and onboarding protocols — delaying integration and exposing the portfolio.
-  **Insurance & Legal Exposure Without Cyber Governance**
Carriers demand controls and documentation that internal teams can't produce, risking coverage gaps and legal liability.

Engagement Models and Sample Scenarios

Flexible Options	
Monthly Retainer	Scheduled Leadership Calls, Roadmap Reviews, Board-Level Reporting
Project-Based Advisory	M&A Cyber Due Diligence, Incident Response Tabletop Exercise, Security Roadmap Creation, Compliance Audits
On-Demand Crisis Response Leadership	Breach Response, Legal Coordination, Executive Briefings

Our Solutions

-  **Fractional Dedicated vCISO**
Serves in the role of your named CISO — guiding security strategy, compliance, and board-level reporting. Embedded executive leadership without the overhead.
-  **Project-Based vCISO**
Defined-scope leadership for high-impact initiatives. Oversees security services including but not limited to M&A, cloud migration, compliance rollouts, and vendor risk assessments.

-  **On-Demand vCISO**
Rapid-response advisory for urgent decisions or short-term gaps. Allows for flexible hours, fast turnaround, no long-term commitment.

Fractional leadership. Full-spectrum protection. Let's build your roadmap
